SKILLS

- **Programming Languages:** TypeScript, JavaScript, Python, Go, Java, SQL, Swift, Kotlin
- **Frontend Development:** React.js, Next.js, Tailwind CSS, SwiftUI, Three.js, WebGL, GSAP
- **Backend & APIs:** Node.js, Express.js, Flask, REST APIs, Webhooks, API Integration
- **Databases & Caching:** PostgreSQL, MongoDB, Firebase Firestore, Redis
- **Cloud & DevOps:** AWS, Azure, Docker, Terraform, Jenkins, GitHub Actions, Linux, Git, CI/CD
- **AI, Security & Architecture:** AI Agent Workflows, AI-Assisted Development, LLM Integration, RBAC, JWT, API Authentication, System Design

LANGUAGES

- English (Fluent)
- Burmese (Native)

PROFILE

Recent **Computer Science graduate** specializing in Software Engineering, with practical experience in full-stack development, cloud infrastructure, and AI automation. Currently a software engineering intern at **RAAS PAL and NNPC Consulting**, building internal tools and AI workflow automation. As **CTO of GlowOps**, architected and shipped a multi-tenant AI booking platform to production on AWS, winning **TrueLAB Open Innovation Runway 2026**. Proficient in Next.js, TypeScript, Go, Python, PostgreSQL, REST APIs, and CI/CD, using AI-assisted development to deliver faster without sacrificing code quality.

EXPERIENCE

GlowOps - CodeBlue Team
April 2026 - Present

(CTO)

🔗 Website: glowops.codeblue.software

- **Winner, TrueLAB Open Innovation Runway 2026**; advanced to ฿100,000 ScaleX stage.
- Lead technical direction for a LINE-first AI booking platform for beauty and wellness SMEs.
- Shipped to **production on AWS; live pilot with 2 businesses.**

RAAS PAL Co., Ltd.
September 2026 - Present

(Software Engineering Intern)

- Build full-stack internal web applications in Next.js, Spring Boot and AWS that turn robot fleet and service data into dashboards, planning tools and reports for operations, service and management teams.
- Redesigned and maintain the company's public websites, including a bilingual e-commerce store.

NNPC Consulting Co., Ltd.
August 2026 - Present

(Software Engineering Intern)

- Build and test **AI agent workflows** automating internal business and operational processes; integrate AI tooling with existing systems and support prototyping, testing, and deployment.

Schedjuice Company Limited
August 2025 - October 2025

(Frontend Developer Intern)

- Built and improved web app features for an education automation platform using Next.js and Tailwind CSS. Collaborated through GitHub to fix issues, refine UI components, and support product development.

PROJECTS

GlowOps
April 2026 - Present

🔗 Website: glowops.codeblue.software

- Multi-tenant platform where clinic customers ask, book and pay deposits in LINE, plus staff, admin and customer web apps.
- Designed the channel gateway, **rules-first AI orchestrator**, and availability and deposit engines in TypeScript.
- Terraform-managed AWS across 8 repos, with automated releases and nightly backups.

JTrax — Chess School Management Platform (Client Project)
🔗 Website: admin.jcachess.ac.th | portal.jcachess.ac.th

July 2026 - Present

- Go REST API with role-scoped SQL authorization; Next.js admin and web portals, and a React Native mobile app
- Fine-tuned Maia-2 into a human-like chess opponent matched to each student's level
- Led architecture and delivery across **5 services**: backend, admin portal, web, mobile, and ML
