SKILLS

- **Programming Languages:** Java, Python, Swift, Kotlin
- **Web Development:** JavaScript, React, Next.js, Tailwind CSS, TypeScript
- **Backend & Cloud:** AWS, REST APIs, Flask, PostgreSQL, Express.js, Go
- **Mobile Development:** Swift (iOS), Kotlin (Android)
- **Version Control:** Git, GitHub
- **Software Development:** Object-Oriented Programming (OOP)
- **DevOps:** AWS, Azure, Docker, Shell, Jenkins, Terraform
- **Databases:** PostgreSQL, MongoDB, Firebase Firestore
- **Others:** Jupyter Notebook, Microsoft Office, CLI

LANGUAGES

- English (Fluent)
- Burmese (Native)

PROFILE

Computer Science student specializing in **Software Engineering**, seeking a software engineering internship in web, mobile, backend, or cloud-based development. Completed a **frontend developer internship** using **Next.js** and **Tailwind CSS**, and gained hands-on experience building projects with React, Swift, Kotlin, Flask, Firebase, PostgreSQL, Docker, GitHub, and AWS. Key strengths include adaptability across multiple tech stacks, team-based development experience, and **technical leadership** in a **TrueLAB Open Innovation Runway 2026 finalist project** involving **AI workflows, system integration**, and SME-focused software solutions.

EXPERIENCE

Schedjuice Company Limited August 2025 - October 2025
(Frontend Developer Intern)

- Built and improved web app features for an education automation platform using Next.js and Tailwind CSS. Collaborated through GitHub to fix issues, refine UI components, and support product development.

GlowOps - CodeBlue Team April 2026 - Present
(Project CTO / Systems Integration & Technical Lead)

- Leading a TrueLAB Open Innovation Runway 2026 finalist project with TrueLAB mentoring, building a LINE-first AI operations copilot for beauty and wellness SMEs. Responsible for system architecture, integrations, AI workflows, and staff approval hub development.

PROJECTS

MotoPedia (Android - Wikipedia for Motorcycles) 2/2024 Semester

 GitHub: github.com/Kusk24/Android-Term-Project

- Team project: Android motorcycle encyclopedia app using Jetpack Compose & Firebase
- Google Maps & multi-language support; MVVM architecture

Database Backend (Flask, PostgreSQL) 2/2024 Semester

 GitHub: github.com/SoePhonePyae/Database-Backend

- Developed RESTful backend API for GameRental app using Flask and SQLAlchemy
- Managed customer, staff, and admin PostgreSQL databases; role-based access control

Space Shooter Game (Java Game Development) 1/2025 Semester

 GitHub: github.com/Kusk24/Game_Design_Development_Project1

- Vertical & side-scrolling shooter game with animated sprites, boss battles, and power-ups
- Implemented CSV map loading, progressive difficulty, sound effects, and scoring dashboard

AUGO (iOS - Social Media with AR Interaction) 2/2025 Semester

 GitHub: github.com/Kusk24/AuGo

- Team project: iOS social media app with AR collectible capturing using SwiftUI & Firebase
- Features: AR camera with device motion tracking, holographic cards, campus map, announcements, leaderboard system
- Auth, Keychain, modular design, SPM libraries

More Projects and Contributions on GitHub: github.com/Kusk24

CERTIFICATES

- [AWS Academy Cloud Foundations](#) | [AWS Academy Cloud Developing](#) | [AWS Academy Cloud Operations](#) | [Huawei Cloud Developer Certifications](#)

EDUCATION

Assumption University of Thailand
Bachelor of Science in Computer Science (BSCS)
Software Engineering Concentration
GPA: 3.72 / 4.0 June 2023 - Expected October 2026
